## ***NxtGate EasyMeet: Meet and Collaborate with Ease***

### **Intended Use**

The *NxtGate EasyMeet* solution brings the world of clinical stakeholders closer virtually! It also revolutionizes clinical stakeholders' experiences and interactions with and within healthcare institutions!

The *NxtGate EasyMeet* is designed and developed based on latest internet technology, including HTML5 and javascript. It is compatible with WebRTC - the open standard for Web communication – to ensure continuous evolution and browser compatibility for wider user adoption as well as support of broader use cases.

The technological architectural innovation enables simplification of complex communication infrastructure while delivering optimal user experiences with high quality audio / video teleconferencing features. Imagine an entire Zoom or Microsoft Teams Meeting backend infrastructure simplified and optimized for your usage!

Beyond its technological edge on infrastructural optimization, the solution is also designed with ease of application integration in mind. This simply means that the *EasyMeet* solution can be easily embedded in your applications such that it feels to be part of the original software application, thereby providing seamless use experience.

The *EasyMeet* solution offers flexibility for organizing teleconferences while ensuring proper grouping of users for respective sessions. Additional participants can also be added into ongoing teleconferences as required. The dynamic operations facilitate ad hoc usage requirements, making it an indispensable tool for virtual collaboration.

*NxtGate EasyMeet* commonly adopts a Software-as-a-Service (SaaS) model. The approach is recommended to realize immediate deployment outcome and be productive from the first day!

***Virtual meetings from anywhere*** – There are no more restrictions on location and devices. The setup is simple and user-friendly on any personal computer or mobile devices.

## ***The NxtGate EasyMeet Solution***

***Collaboration from Anywhere*** – Realize the ease of virtual collaboration from anywhere – even at the comfort of your home, without any software installation. Be free from the constraints of the physical workstation!

***Access from Anywhere*** – User participation is as easy as usual web browsing. The user is provided with a web link to gain access to the session. The web link works on mobile devices and without the need to download applications from Apple Store or Google Play store. Simply enter the provided web link and start accessing your data.

***Simplified and Intuitive User Interface*** – The user experience of the solution is designed to be simple for easy navigation. It is intuitive with no user training requirements. Simply connect and start virtual collaboration.

Application integration facilitates the workflow of adding users to the session. With a few clicks, collaboration is setup. Invited users receive email with details on session as well as connection information.

***No software installations required*** – No software installation is required. Simply use the link provided in email to start virtual meeting or collaboration. With no software footprint, there is no requirement to update or upgrade the client software.
